

WHY ACCO?

ACCO will start by performing a free IT Health Screening of your existing IT infrastructure. This will include the review of the existing hardware, software and any IT-related processes to ensure that ACCO is able to provide something “of need” to all customers. Without a sound IT infrastructure, the implementation of any solutions will always lead to underutilization of the IT resources, thus leading to a long time before attaining break even. With this in

mind, ACCO finds it inappropriate to quote for just a

“ACCO looks forward to grow with your company.”

business solution without first identifying (and addressing) any immediate IT needs.

The Returns of Investment (ROI) is expected to be less than 3 years. The Returns of Investment (ROI) is expected to be about 2 years.

Welcome to the ACCO experience.
